PURPOSE

The purpose of S. 522 is to ratify an agreement entered into by the Secretary of the Interior, the State of Alaska, and the Bering Straits Native Corporation to resolve certain land selections under the Alaska Native Claims Settlement Act and the Alaska Statehood Act.

BACKGROUND AND NEED

Salmon Lake is one of the largest bodies of fresh water on the Seward Peninsula and has been an important source of food and resources for Native Alaskans since ancient times. The lake is located approximately 40 miles northeast of Nome and is a popular recreation destination with campgrounds and other lands that are managed by the Bureau of Land Management (BLM).

The Alaska Native Claims Settlement Act (ANCSA) created Regional Native Corporations with the right to select certain Federal land as part of a settlement of aboriginal land claims in Alaska. The Bering Straits Native Corporation (BSNC) exercised its rights under ANCSA by selecting land around Salmon Lake. The State of Alaska also selected some of the same land under the Alaska Statehood Act, which granted the State the opportunity to select certain Federal land in Alaska for the benefit of the State.

To resolve the conflicting claims and avoid further administrative and legal challenges, the State, BSNC and the BLM entered into negotiations and subsequently signed the “Salmon Lake Area Land Ownership Consolidation Agreement” in 2007. Both the State and BSNC relinquished certain claims in order to settle the dispute. The Agreement provides for the conveyance of approximately 3,084 acres of land in the Salmon Lake area to the State and approximately 14,644 acres of land in the Salmon Lake, Imuruk Basin, and Windy Cove areas to BSNC. The BLM would maintain ownership of a nine acre campground with access to other important Federal lands nearby and retain a number of public access easements and other appropriate reservations.

The initial effective date of the negotiated agreement was July 18, 2007, and it was set to expire by its own terms on January 1, 2009. The term of the Agreement was extended until January 1,

2011, unless legislation is enacted ratifying the terms of the Agreement or the parties agree to further extend the term of the Agreement.

LEGISLATIVE HISTORY

S. 522 was introduced by Senators Murkowski and Begich on March 4, 2009. The Subcommittee on Public Lands and Forests held a hearing on the bill on October 8, 2009. At its business meeting on December 16, 2009, the Committee on Energy and Natural Resources ordered S. 522 favorably reported with an amendment in the nature of a substitute.

COMMITTEE RECOMMENDATION

The Committee on Energy and Natural Resources, in open business session on December 16, 2009, by a voice vote of a quorum present, recommends that the Senate pass S. 522, if amended as described herein.

COMMITTEE AMENDMENT

During its consideration of S. 522, the Committee adopted an amendment in the nature of a substitute. The amendment clarifies and adds a number of definitions to the bill, includes specific direction on the reservation of easements by the United States, and limits future modifications to the Agreement. The amendment is explained in detail in the section-by-section analysis below.

SECTION-BY-SECTION ANALYSIS

Sections 1, 2, and 3 provide the short title, purpose, and definitions for the bill.

Section 4(a) ratifies the Agreement.

Subsection (b) requires the conveyance of land to BSNC to be subject to the reservation of certain easements specified in the Agreement. Paragraph 4.b.(3)(B) of the Agreement provides that the conveyances to the State shall be “subject to appropriate reservations, exceptions, exclusions, and limitations.” Paragraph 4.b.(3)(C) of the Agreement has identical language in relation to the conveyances to BSNC, but it also provides for the reservation of specific easements (identified in Appendix E to the Agreement), which “shall be reserved pursuant to the legislation ratifying this Agreement.” Subsection (b) specifically provides for those easements to be reserved pursuant to terms of the bill, while at the same time clarifying that the easements are substantively the same as easements reserved pursuant to section 17(b) of ANCSA.

Subsection (c) limits modifications to the Agreement after the date of enactment of the bill to typographical and clerical corrections.

Subsection (d) directs the Secretary of the Interior to carry out all actions required by the Agreement.

COST AND BUDGETARY CONSIDERATIONS

The following estimate of costs of this measure has been provided by the Congressional Budget Office:

S. 522—Salmon Lake Land Selection Resolution Act

S. 522 would ratify an agreement settling a land dispute between the state of Alaska and the Bering Straits Native Corporation (a native-owned regional corporation established to administer land given to Alaska Natives under the Alaska Native Claims Settlement Act). Based on information from the Bureau of Land Management (BLM), CBO expects that implementing the legislation would have a negligible impact on the federal budget.

Under the bill, the federal government would convey about 18,000 acres of land located in western Alaska to the Bering Straits Native Corporation and the state of Alaska to satisfy claims made by those parties under the Alaska Native Claims Settlement Act and the Alaska Statehood Act. The federal government currently collects about \$1,500 per year from a lease on the affected land. Based on information from BLM, CBO estimates that implementing the bill would reduce federal receipts by less than \$20,000 over the 2010–2020 period.

S. 522 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would impose no costs on state, local, or tribal governments.

The CBO staff contact for this estimate is Jeff LaFave. The estimate was approved by Theresa Gullo, Deputy Assistant Director for Budget Analysis.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 11(b) of rule XXVI of the Standing Rules of the Senate, the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 522.

The bill is not a regulatory measure in the sense of imposing Government-established standards or significant economic responsibilities on private individuals and businesses.

No personal information would be collected in administering the program. Therefore, there would be no impact on personal privacy.

Little, if any, additional paperwork would result from the enactment of S. 522, as ordered reported.

CONGRESSIONALLY DIRECTED SPENDING

S. 522, as reported, does not contain any congressionally directed spending items, limited tax benefits, or limited tariff benefits as defined in rule XLIV of the Standing Rules of the Senate.

EXECUTIVE COMMUNICATIONS

The testimony provided by the Bureau of Land Management at the subcommittee hearing on S. 522 on October 8, 2009 follows:

STATEMENT OF MARCILYNN A. BURKE, DEPUTY DIRECTOR,
BUREAU OF LAND MANAGEMENT, DEPARTMENT OF INTERIOR

Thank you for the opportunity to testify on S. 522, the Salmon Lake Land Selection Resolution Act. As a party to the Salmon Lake Area Land Ownership Consolidation Agreement, the Bureau of Land Management (BLM) has supported efforts between the State of Alaska and the Bering Straits Native Corporation (BSNC) to resolve overlap-

ping land selections at Salmon Lake. As such, the BLM supports S. 522 because it will ratify the agreement between the BLM, BSNC, and the State of Alaska, and allow for a reasonable and practicable conveyance of lands in the Salmon Lake area.

BACKGROUND

Salmon Lake is located on the Seward Peninsula, approximately 40 miles northeast of Nome. The lake is one of the largest bodies of fresh water on the peninsula, and has long been an important source of food and resources for the Native people. Because the area contains significant fisheries and other subsistence resources, it remains a popular resource and destination for local communities.

The BLM is responsible for expediting the conveyance of Federal lands to Native corporations, including the BSNC, under the Alaska Native Claims Settlement Act (ANCSA), and to the State of Alaska under the Alaska Statehood Act of 1958.

The BSNC, the Native regional corporation for the Bering Straits area, and the State of Alaska each sought to gain title to the Salmon Lake area through selection applications filed under respective provisions of ANCSA and the Alaska Statehood Act. However, the land addressed by the two applications overlapped. The BSNC and the State negotiated a resolution to this issue whereby each entity would receive title to distinct lands. The BLM supported this resolution, and the three parties signed the Salmon Lake Area Land Ownership Consolidation Agreement on July 18, 2007. Legislation is now required to ratify the Agreement between the United States (acting through the Department of Interior, BLM), the BSNC, and the State of Alaska. The Agreement would have expired on January 1, 2009, but its term was extended to January 1, 2011 in anticipation of ratifying legislation.

S. 522

S. 522 represents an opportunity to resolve the overlapping land selections between the BSNC and the State. The bill would ratify the Agreement between the BLM, the BSNC, and the State, and allow for finalization of land conveyances in the Salmon Lake area. The lands would be transferred in accordance with the terms of the signed Agreement.

As noted, the BLM supported the efforts between the BSNC and State, and signed the Agreement to recognize the desires of the entities. The bill would also further the intent of the Alaska Land Transfer Acceleration Act of 2004 (PL 108-452), expediting the transfer of title to federal lands to Native corporations and the State of Alaska.

CONCLUSION

Thank you for the opportunity to testify in support of S. 522. I am happy to answer any questions.

CHANGES IN EXISTING LAW

In compliance with paragraph 12 of rule XXVI of the Standing Rules of the Senate, the Committee notes that no changes in existing law are made by S. 522, as ordered reported.
